Components by provider (updated catalog section)

Replaces the "Components by provider" section (Full Plan pp. 15–18). Every link was read on **Oct 20, 2026**. A link shows where to look; it does not mean the limits were read.

Status labels

- **Verified**: limits read and recorded in the Verified-limits table (pp. 21–23) or the Oct 18, 2026 AWS spot check (Lambda, SQS, S3, CloudFront).
- **Partial**: the page states some limits but not all, or the figures are guidance rather than quotas.
- **Listed (not checked)**: an official limits page exists and is linked, but its figures are not yet recorded in the plan.
- **No limits on page**: the linked official page states no limits (concept or overview pages).

Changes from the previous version:

- 17 services moved from "limits checked" to Listed (not checked): AWS DynamoDB, API Gateway, SNS, EventBridge; Azure Functions, Blob Storage, Cosmos DB, Event Grid, API Management; GCP Cloud Run, Cloud Run functions, Cloud Storage, Firestore. Front Door, Content Delivery Network, Cloud CDN and Apigee are reclassified below.
- 6 changed because of what their pages state: S3, Azure Front Door, Azure Load Balancer, Cloud CDN and Apigee are now Partial; Azure Content Delivery Network is now No limits on page.
- GCP Pub/Sub: the old link returned 404. It is replaced by the confirmed official page https://docs.cloud.google.com/pubsub/quotas ("Pub/Sub quotas and limits").
- GCP Dataproc: Google renamed it "Managed Service for Apache Spark"; the old link redirects to https://docs.cloud.google.com/managed-spark/quotas. The catalog keeps the name Dataproc and notes the new name.
- Naming: use "Application Load Balancer" everywhere; "ALB" is allowed only as a short label. The canvas sources "Viewers" and "Uploaders" are labels on the Generic **Clients** component, not catalog services. ECR is not a catalog entry.
- Kubernetes: the 7 objects are kinds with no limits on their pages. Cluster size limits get their own row ("Kubernetes scalability thresholds", Partial).

Counts

Provider	Services	Verified	Partial	Listed (not checked)	No limits on page
AWS	50	9	1	40	0
Azure	44	4	2	36	2
GCP	35	5	2	28	0
Kubernetes	8	0	1	0	7
Total	**137**	**18**	**6**	**104**	**9**

Generic (9 components, no provider page): Clients, Load balancer, Service, Cache, Database, Queue, Worker pool, CDN, Object store. The canvas labels "Viewers" and "Uploaders" are Clients.
